BEXAR COUNTY

Benefits

Safer, cleaner environment for the community

The limiting of amounts of contaminants running into creeks, streams and lakes in the area

Making Things Happen

Partners:

Texas Commission on Environmental Quality

San Antonio Water Systems

Funded by:
Texas Commission on Environmental Quality-Supplemental Environmental Projects

WASTEWATER SYSTEMS PROJECT

A \$10,000 grant was received through the Texas Commission on Environmental Quality Supplemental Environmental Project to provide technical and financial assistance in the upgrading and/or installation of septic systems in the community of Elmendorf in Bexar County.

In cooperation with the San Antonio Water System, low-income Hispanic female homeowners were provided technical and financial assistance to upgrade their failing septic systems. The systems were funded at 100% and the homeowners were able to request water and electricity after the system was installed. A total of four systems were installed.
